# SEARCHING FOR DATA

Discover data by specifying the :

- Time range you are interested in by selecting start and end dates
- Parameter you want to observe by using the Keyword selector (leaving this blank will return all parameters)
- Your area of interest by navigating to a place on the map

You can also select one or more data sources if you would like to filter which organizations are returned in your search. Search results are displayed as map markers. Click on a marker to View All Search Results to see detailed information about the data you've found.
